SMART SECURITY

Security that is managed with the tap of a button... from your mobile phone! Smart Security, is taking the world by storm and it's imperative that we evolve too!

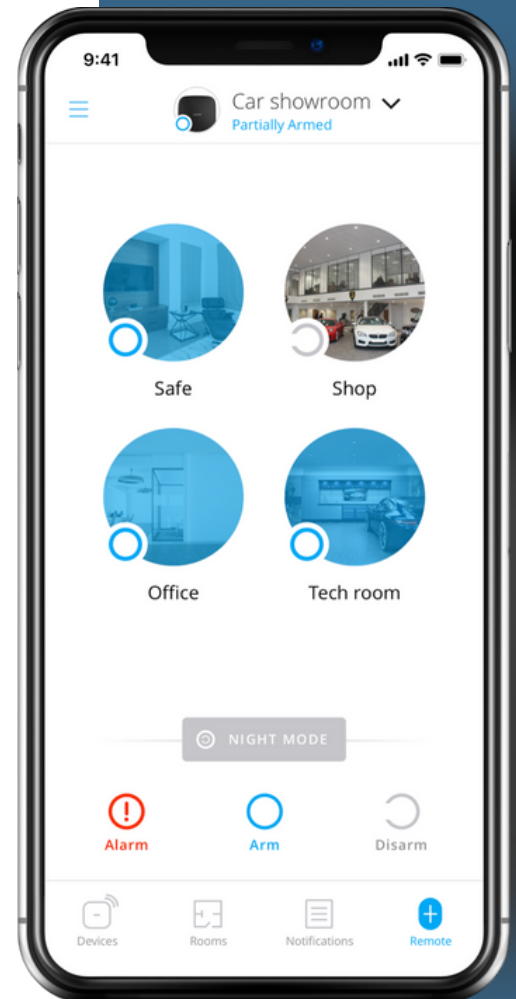

With the new AJAX Alarm Systems, you can monitor and manage your security while you are thousands of miles away. With a virtual panic button, you can report any emergency for other users and appointed service providers to come to your rescue.

Keep track of who made any system changes and keep track of what happened and when, with the state-of-the-art notifications software, this brand provides. With the detailed device status you get instant information about battery levels, room temperature and settings.

With the new innovative technology, you can set-up a two-factor authentication to access the app from your mobile device, adding additional security.

With the automated App updates, you will get new features that improve system security capabilities.

Motiontech Security Solutions - The SMART choice for SMART security!

INTRODUCING: AJAX Systems

The most award-winning wireless security system in Europe

Professional security system that leaves troubles behind the scene

- Intrusion Alert
- Indoor Security
- Outdoor Security
- Fire Detection
- Flooding/Water Leak Detection
- Appliance and Electric Automation
- Wireless Installation
- Protect your home with a tap
- Monitor your home, remotely in full HD

INTRUSION SYSTEMS

One of the most important components of a comprehensive security system today is advanced intruder detection.

Motiontech provides an extensive range of systems, designed to detect and deter intruders from that critical first moment when security is either breached or threatened.

Motiontech provides state-of-the-art equipment including indoor and outdoor detectors, wireless technology, video verification, GSM/GPRS communication, powerful control panels, accessory modules and wireless App integration with the new AJAX Smart Security. The control panels combine advanced electronics with an extensive array of engineering and user facilities, providing effective solutions for all security needs. The wireless control systems that AJAX security systems provide, is the smart choice and is equipped for the modern world, with the App that provides access to your overall security system(s). The flexibility of Motiontech's product range has allowed it to be applied to a broad scope of residential, commercial and industrial applications.

ACCESS CONTROL

Motiontech provides a wide range of access control technology for the most extensive range of applications. From time and attendance to monitoring solutions, integrated or standalone, Motiontech provides for all its customers typical and diverse needs.

Electronic access technology is an effective system for controlling access to sites, facilities, buildings and rooms.

Plastic access cards or tags are reasonably priced and advanced software can be programmed to restrict access to pre-determined areas while recording the time, date and location of authorised and unauthorised access attempts.

Now also available is a long-range vehicle access system that combines with traditional access control to facilitate the entry and exit.

BIOMETRIC SYSTEMS

Biometrics (or biometric authentication) refers to the identification of humans by their characteristics or traits. Biometrics is used in computer science as a form of identification and access control. It is also used to identify individuals in groups that are under surveillance.

Biometric identifiers are the distinctive, measurable characteristics used to label and describe individuals. Biometric identifiers are often categorized as physiological versus behavioral characteristics. Physiological characteristics are related to the shape of the body. Examples include, but are not limited to fingerprint, face recognition, DNA, palm print, hand geometry, iris recognition, retina and odour/scent. Behavioral characteristics are related to the pattern of behavior of a person, including but not limited to: typing rhythm, gait, and voice. Some researchers have coined the term behaviometrics to describe the latter class of biometrics.

More traditional means of access control include token-based identification systems, such as a driver's license or passport, and knowledge-based identification systems, such as a password or personal identification number. Since biometric identifiers are unique to individuals, they are more reliable in verifying identity than token and knowledge-based methods.

CCTV

As a leading security camera service provider, Motiontech can meet your security needs in different scenarios. Our IP cameras renders high quality images even in low illumination environment while featuring smart functions based on video content analytics, and minimizing bandwidth and storage. The most important business value of them is to provide excellent performance at an affordable price.

Motiontech has been dedicated to the surveillance industry for years, accumulated experience and knowledge on varied scenes and scenarios, and presented comprehensive surveillance solutions which can be applied to all kinds of surveillance scenes. The company's innovative security solutions include fixed cameras, domes, DVR's, NVR's, monitors and the most recent and advanced AJAX Smart Security systems and software available. Integration is also a strong area in which the company operates. Motiontech's high-tech range of video solutions effortlessly combines globally acclaimed technology with easy installation.

AUTOMATION

Electric gates are an easy way to ensure the security of private premises and can be used for all sizes of properties. Electric gates are becoming more popular as a result of driveway attacks and hi-jackings, where people are exposed to the criminal elements when opening their gates manually. For those who find the security of their premises (be it residential or commercial) important, electric gates are the way to go. There is a decrease in the cost of electric gate kits and their installation. Aside from the basic kits, there are now many features that can be added to ensure security as well as make them more convenient.

Centurion gate motors, swing gate motors, garage door motors...

INTERCOM SYSTEMS

An intercom (intercommunication device), talk-back or door-phone is a stand-alone voice communications system for use within a building or small collection of buildings, functioning independently of the public telephone network. Intercoms are generally mounted permanently in buildings and vehicles. Intercoms can incorporate connections to public address loudspeaker systems, walkie talkies, telephones, and to other intercom systems. Some intercom systems incorporate control of devices such as signal lights and door latches.

BPT INTERCOM SYSTEMS, WIRELESS INTERCOM SYSTEMS, GSM SYSTEMS...

The most award-winning wireless security system in Europe
NOW AVAILABLE AT:

An electric fence is a FIRST LINE OF DEFENSE barrier that uses electric shocks to deter animals or people from crossing a boundary.

The voltage of the shock may have effects ranging from uncomfortable, to painful or even lethal. Electric fences are designed to create an electrical circuit when touched by a person or animal. A component called an energizer converts power into a brief high voltage pulse.

One terminal of the energizer releases an electrical pulse along a connected bare wire about once per second. Another terminal is connected to a metal rod implanted in the earth, called a ground or earth rod. A person or animal touching both the wire and the earth during a pulse will complete an electrical circuit and will conduct the pulse, causing an uncomfortable electric shock.

The effects of the shock depends upon the voltage, the energy of the pulse, the degree of contact between the recipient and the fence and ground and the route of the current through the body; it can range from barely noticeable to uncomfortable, painful or for some fences even lethal. The monitoring of the outputs and alarm siren is a major contributing factor in the effectiveness of the electric fence.

Wall top fences, estate fences, game farm fences, full fences. ...

OUR SISTER COMPANY

ClearView Fencing (PTY) Ltd, is a South African private company, supplying, delivering and installing clear view type fencing.

With more than 16 years experience in the security sector and industry. It's not just another fence, ClearView Fencing (Pty) Ltd brings you clearview fence installations and solutions. It is a trend setting, high security, anti-climb fence, with an alluring appearance.

OUR MISSION STATEMENT

OUR MISSION

To assist the clients in the protection of people and property by providing quality innovative solutions with professionally trained staff.

OUR VISION

To remain the supplier and installer of choice with full turnkey solutions in the security industry as supported by our slogan of Superior Smart Security Suppliers and Installers .

CORPORATE BELIEFS AND VALUES

PASSION

Our culture of striving for excellence means that the passion with which we take on our daily challenges comes through in the work we do.

ETHICS

We strive to carry out our business with honesty, integrity and create a strong sense of mutual trust and respect.

TEAMWORK

We use coordinated efforts of supporting each other and acting together to provide the market with a superior service.

CARING

We understand that everything we do will have an impact on the safety of our clients and their property, therefore we are responsive to their needs.

ABOUT US

OUR CLIENTS

Motiontech's customer base is comprised of residential and corporate clients who need to acquire a complete security solution through electronic security equipment. By developing close working relationships, Motiontech is able to understand the unique needs of each customer, thereby creating personalised and tailored security on a case by case basis.

OUR PRODUCTS AND BRANDS

Motiontech's globally acclaimed and award-winning range of security solutions has earned the company a formidable reputation as one of the most recognised and trusted suppliers and installers of the world's top brands. This proud affiliation enables Motiontech to source top-class products for the market.

Our brands have received numerous awards and ongoing industry recognition as proven security solutions.

"WHEN SECURITY BECOMES ART" - AJAX SECURITY SYSTEMS

OUR STAFF

Going beyond the call of duty to exceed customer expectations is a principle understood and fostered by all Motiontech staff members. Experienced and highly professional Motiontech staff make every effort to share the benefit of their expertise to assist customers by providing effective security solutions to fit their budget. In addition all purchases are backed by comprehensive training and ongoing support.

OUR SERVICES

Motiontech has built strategic relationships with suppliers and manufacturing companies worldwide in order to provide products that meet the specific needs of South Africans. Motiontech also recognises that state-of-the-art technology is not a solution in itself, it must be combined with exceptional service; from consultation right through to on-site assistance.
